Section 4: Emergency Use Authorization

The FDA has made the COVID-19 vaccine available under an emergency use authorization (EUA). The EUA is used when circumstances exist to justify the emergency use of drugs and biological products during an emergency, such as the COVID-19 pandemic. This vaccine has not completed the same type of review as an FDA-approved or licensed vaccine. However, the FDA's decision to make the vaccine available under an EUA is based on the existence of a public health emergency and the totality of scientific evidence available, showing that known and potential benefits of the vaccine outweigh the known and potential risks.

Section 5: Consent

I have read or have had explained to me the information provided in the Emergency Use Authorization (EUA) Factsheet or Vaccine Information Statement about the COVID-19 vaccine. I have had a chance to ask questions that were answered to my satisfaction. I understand that the provider is required to report all COVID vaccine doses to the state Immunization Information System. I understand the benefits and risks of the COVID-19 vaccine and ask that the vaccine be administered to me or to the person named above for whom I am authorized to make this request. The scope of this consent includes administration of the vaccine, discussion with a provider if requested, care, and treatments immediately after administration as needed.
